Re: Interview regarding US 09/810,940  
Our ref. 41486

Dear Mr. Yao:

We have scheduled our interview for 1 PM on Monday, September 26. I look forward to meeting you. I believe Darby & Darby have sent you an authorization for me to act in a representative capacity in this case.

My agenda for the interview is to discuss in detail the rejection of amended claim 1 over Ciaddis (U.S. 5,815,501). Specifically, in your "Response to Arguments," you state that Ciaddis illustrates in Fig. 10 the fetching of frames from shared memory in order, and thus anticipates the invention recited in claim 1. The claim, however, recites reassembling the fragments of the data frame in the fragment order in the host memory, not fetching the fragments in order after they have been stored out of order, as Ciaddis does. I would like to discuss this distinction with you, in the hope of persuading you to allow the claims or, if not, at least to understand the grounds of rejection better for purposes of an RCE or appeal.

Sincerely yours,

Daniel Kligler, Ph.D.  
Reg. No. 41,120
